Thank you Jason. I look forward to meeting with you. I will touch base with you again in early April to coordinate a meeting/ field visit with you for April 17th.

My recollection is that the Navy normally sends out an agenda to its mailing list a few weeks prior to its RAB meetings. Would it be best for me to reach out directly to the Navy contact (Brian Murray) to ask to be included on the mailing list?

Thanks,  
Carol

Carol:

Thanks for the email and update. I will be at the April 17 RAB meeting. Right now we do not have specific plans that afternoon and am thinking that we could either meet to discuss the project and/or visit some of the locations where field activities are occurring.

Thanks and lets coordinate a meeting as the date approaches.

Jason

Good morning Jason. As you may have already heard, a transition is underway for transferring the NWIRP and Grumman Bethpage sites from EPA's Superfund program back to EPA's RCRA program. It looks like I will be the EPA lead, and I am in the process of coordinating with Lorenzo Thantu on the upcoming transfer. I had been involved with this project from the late 1990s until early 2018, and I am looking forward to returning. Although it has been over two years since I have been assigned to NWIRP-Bethpage, I try to read whatever news articles I can about this project. Based on recent discussions, my understanding is that although the federal role has been substantially decreased, EPA still needs to have a general knowledge of the project.

Lorenzo mentioned that the Navy is planning a Restoration Advisory Board meeting for the evening of Wednesday April 17<sup>th</sup>. It looks like my Section Chief, Nidal Azzam will be able to attend the RAB meeting.

Although unfortunately I cannot be available the evening of April 17<sup>th</sup>, I can be available that day. If you plan to be at the site during the day on April 17<sup>th</sup>, I was wondering if you might be available to meet with me (and probably also Nidal) to take a look at some of the field work that currently is being done in the project area? If you have plans to review the study area with the Navy on Apr 17<sup>th</sup>, we would be happy to tag along if that works for you. This would help me to brush up on the project and it would provide Nidal with an introduction.

Regards,

-Carol-
